Case Status API

Select a Version

1.0.0 documentation - Current

Provides case status information to USCIS customers and their representatives who require regular access to case status information.

Sandbox API URL:

`https://api-int.uscis.gov/case-status`

Authentication

The authentication model uses OAuth 2.0. Client Credentials are granted when you register your Developer App. Using your Client Credentials, you can request for an Access Token by hitting our Authentication URL. Access token are passed in your API's request headers and are validated upon making a request to the API Endpoint.

For more about USCIS Authentication Methods and OAuth 2.0 please see more here.

Access Token URL

Sandbox Access Token URL: `https://api-int.uscis.gov/oauth/accesstoken`

Staging Receipt Numbers

The Sandbox environment currently supports staging **receiptNumbers** only.

Staging `receiptNumbers` with `hist_case_data` in payloads

```
